

**DROUGHT CONTINGENCY PLAN  
FOR  
OLD MARBACH SCHOOL  
WATER SUPPLY CORPORATION**

**P.O. Box 268  
George West, Texas 78022**

**CCN 12912**

**February 8, 2006**

**Section 1: Declaration of Policy, Purpose, and Intent**

In cases of extreme drought, periods of abnormally high usage, system contamination, or extended reduction in ability to supply water due to equipment failure, temporary restrictions may be instituted to limit nonessential water usage. The purpose of the Drought Contingency Plan (Plan) is to encourage customer conservation in order to maintain supply, storage, or pressure or to comply with the requirements of a court, government agency or other authority.

**Please note:** Water restriction is not a legitimate alternative if a water system does not meet the Texas Commission on Environmental Quality (TCEQ) capacity requirements under normal conditions **or** if the utility fails to take all immediate and necessary steps to replace or repair malfunctioning equipment.

**Section 2: Public Involvement**

Opportunity for the public to provide input into the preparation of the Plan was provided by:

This Drought Contingency Plan (DCP) will be made available for public review at the Old Marbach School Water Supply Corporation offices. A bill insert will be added to the March billing statement notifying all customers of the DCP, its viewing location, and requesting their comments.

**Section 3: Public Education**

The Old Marbach School Water Supply Corporation will periodically provide the public with information about the Plan, including information about the conditions under which each stage of the Plan is to be initiated or terminated and the drought response measures to be implemented in each stage.

Drought plan information will be provided by: **Utility Bill Inserts**

## **Section 4: Coordination with Regional Water Planning Groups**

The service area of the Old Marbach School Water Supply Corporation is located within Regional Water Planning Group (RWPG) for the Nueces Region.

The Old Marbach School Water Supply Corporation has provided a copy of this Plan to the RWPG.

## **Section 5: Notice Requirements**

Written notice will be provided to each customer **prior to implementation or termination of each stage of the water restriction program**. Mailed notice must be given to each customer 72 hours prior to the start of water restriction. If notice is hand delivered, the utility cannot enforce the provisions of the plan for 24 hours after notice is provided. The written notice to customers will contain the following information:

1. the date restrictions will begin,
2. the circumstances that triggered the restrictions,
3. the stages of response and explanation of the restrictions to be implemented, and
4. an explanation of the consequences for violations.

The utility must notice the TCEQ by telephone at (512) 239-4691, or electronic mail at [watermon@tceq.state.tx.us](mailto:watermon@tceq.state.tx.us) prior to implementing State III and must notify in writing the Public Drinking Water Section at MC-155, P.O. Box 13087, Austin, Texas 78711-3087 within five (5) working days of implementation including a copy of the utility's restriction notice. The utility must file a status report of its restriction program with the TCEQ at the initiation and termination of mandatory water use restrictions (i.e., Stages III and IV).

## **Section 6: Violations**

1. First violation - The customer will be notified by written notice of their specific violation.
2. Subsequent violations:
  - a. After written notice, the utility may install a flow restricting device in the line to limit the amount of water which will pass through the meter in a 24-hour period. The utility may charge the customer for the actual cost of installing and removing the flow restricting device, not to exceed \$50.00.
  - b. After written notice, the utility may discontinue service at the meter for a period of seven (7) days, or until the end of the calendar month, whichever is LESS. The normal reconnect fee of the utility will apply for restoration of service.

## **Section 7: Exemptions or Variances**

The utility may grant any customer an exemption or variance from the drought contingency plan for good cause **upon written request**. A customer who is refused an exemption or variance may appeal such action of the utility in writing to the Texas Commission on Environmental Quality. The utility will treat all customers equally concerning exemptions and variances, and shall not discriminate in granting exemptions and variances. No exemption or variance shall be retroactive or otherwise justify any violation of this Plan occurring prior to the issuance of the variance.

## **Section 8: Response Stages**

Unless there is an immediate and extreme reduction in water production or other absolute necessity to declare an emergency or severe condition, the utility will initially declare Stage I restrictions. If, after a reasonable period of time, demand is not reduced enough to alleviate outages, reduce the risk of outages, or comply with restrictions required by a court, government agency or other authority, Stage II may be implemented with Stage III to follow if necessary.

### **STAGE I – CUSTOMER AWARENESS**

Stage I will begin:

**Every April 1, the utility will mail a public announcement to its customers. No notice to TCEQ required.**

Stage I will end:

**Every September 30, the utility will mail a public announcement to its customers. No notice to TCEQ required.**

#### **Utility Measures:**

This announcement will be designed to increase customer awareness of water conservation and encourage the most efficient use of water. A Copy of the current public announcement on water conservation awareness shall be kept on file available for inspection by the TCEQ.

#### **Voluntary Water Use Restrictions**

Water customers are requested to voluntarily limit the use of water for nonessential purposes and to practice water conservation.

## STAGE II – VOLUNTARY WATER CONSERVATION

**Target: Achieve a ten (10) percent reduction in daily water demand.**

The water utility will implement Stage II when any one of the selected triggers is reached:

### Supply-Based Triggers:

Water supply is reduced to a level that is only 20 percent greater than the average consumption for the previous month.

### Demand- or Capacity-Based Triggers:

Water demand has reached 80 percent of daily maximum supply for three (3) consecutive days.

There is an extended period (at least eight (8) weeks) of low rainfall and daily use has risen 20 percent above the use for the same period during the previous year.

**Upon initiation and termination of Stage II, the utility will mail a public announcement to its customers. No notice to TCEQ required.**

### Requirements for Termination:

Stage II of the Plan may end when all of the conditions listed as triggering events have ceased to exist for a period of three (3) consecutive days. Upon termination of Stage II, Stage I becomes operative.

### Utility Measures:

Visually inspect lines and repair leaks on a daily basis. Monthly review of customer use records and follow-up on any that have unusually high usage.

### Voluntary Water Use Restrictions:

1. Restricted Hours: Outside watering is allowed daily, but only during periods specifically described in the customer notice; between 10:00 pm and 5:00 am, for example;
2. Restricted Days/Hours: Water customers are requested to voluntarily limit the irrigation of landscaped areas with hose-end sprinklers or automatic irrigation systems. Customers are requested to limit outdoor water use to

**Mondays for water customers with a street address ending with the numbers 1, 2, or 3, Wednesdays for water customers with a street address ending with the numbers 4, 5, or 6, and Fridays for water customers with a street address ending with the numbers 7, 8, 9, or 0.** Irrigation of landscaped areas is further limited to the hours of 12:00 midnight until 10:00 am and between 8:00 pm and 12:00 midnight on designated watering days. However, irrigation of landscaped areas is permitted at any time if it is by means of a hand-held hose, a faucet-filled bucket or watering can of five (5) gallons or less, or drip irrigation system; or

3. Other uses that waste water such as water running down the gutter.

### **STAGE III – MANDATORY WATER USE RESTRICTIONS:**

**Target: Achieve a twenty (20) percent reduction in daily water demand.**

The water utility will implement Stage III when any one of the selected triggers is reached:

#### **Supply-Based Triggers:**

The water level in any of the water storage tanks cannot be replenished for three (3) consecutive days. Example: The highest recorded water level drops three (3) feet or more for three (3) consecutive days.

#### **Demand- or Capacity-Based Triggers:**

Water demand has reached 90 percent of the amount available for three (3) consecutive days.

**Upon initiation and termination of Stage III, the utility will mail a public announcement to its customers. Notice to TCEQ required.**

#### **Requirements for Termination:**

Stage III of the Plan may end when all of the conditions listed as triggering events have ceased to exist for a period of three (3) consecutive days. Upon termination of Stage III, Stage II becomes operative.

#### **Utility Measures:**

Visually inspect lines and repair leaks on a regular basis. Flushing is prohibited except for dead end mains.

Mandatory Water Use Restrictions:

The following water use restrictions shall apply to all customers.

1. Irrigation of landscaped areas with hose-end sprinklers or automatic irrigation systems **shall be limited to Mondays for water customers with a street address ending with the numbers 1, 2, or 3, Wednesdays for water customers with a street address ending with the numbers 4, 5, or 6, and Fridays for water customers with a street address ending with the numbers 7, 8, 9, or 0.** Irrigation of landscaped areas is further limited to the hours of 12:00 midnight until 10:00 am and between 8:00 pm and 12:00 midnight on designated watering days. However, irrigation of landscaped areas is permitted at any time if it is by means of a hand-held hose, a facet-filled bucket or water can of five (5) gallons or less, or drip irrigation system.
2. Use of water to wash any motor vehicle, motorbike, boat trailer, airplane or other vehicle is prohibited except on designated watering days between the hours of 12:00 midnight and 10:00 am and between 8:00 pm and 12:00 midnight. Such washing, when allowed, shall be done with a hand-held bucket or a hand-held hose equipped with a positive shutoff nozzle for quick rinses. Vehicle washing may be done at any time on the immediate premises of a commercial car wash or commercial service station. Further, such washing may be exempt from these regulations if the health, safety, and welfare of the public are contingent upon frequent vehicle cleansing, such as garbage trucks and vehicles used to transport food and perishables.
3. Use of water to fill, refill, or add to any indoor or outdoor swimming pools, wading pools, or "Jacuzzi" type pool is prohibited except on designated watering days between the hours of 12:00 midnight and 10:00 am and between 8:00 pm and 12:00 midnight.
4. Operation of any ornamental fountain or pond for aesthetic or scenic purposes is prohibited except where necessary to support aquatic life or where such fountains or ponds are equipped with a recirculation system.
5. Use of water from hydrants or flush valves shall be limited to maintaining public health, safety, and welfare.
6. Use of water for the irrigation of golf courses, parks, and green belt areas are prohibited except by hand-held hose and only on designated water days between the hours of 12:00 midnight and 10:00 am and between 8:00 pm and 12:00 midnight.

7. The following uses of water are defined as nonessential and are prohibited:
- a. wash down of any sidewalks walkways, driveways, parking lots, tennis courts, or other hard-surfaced areas;
  - b. use of water to wash down buildings or structures for purposes other than immediate fire protection;
  - c. use of water for dust control;
  - d. flushing gutters or permitting water to run or accumulate in any gutter or street;
  - e. failure to repair a controllable leak(s) within a reasonable period after having been given notice directing the repair of such leak(s); and
  - f. any waste of water.

**STAGE IV – CRITICAL WATER USE RESTRICTIONS:**

**Target: Achieve a thirty (30) percent reduction in daily water demand.**

The water utility will implement Stage IV when any one of the selected triggers is reached:

**Supply-Based Triggers:**

Water consumption of 100 percent of the maximum available and the water storage levels in the system drop during one 24 hour period.

**Demand- or Capacity-Based Triggers:**

Water demand of 95 percent or more of the maximum available for three (3) consecutive days.

Failure of a major component of the system or an event which reduces the minimum residual pressure in the system below 20 psi for a period of 24 hours or longer.

Other unforeseen events which could cause imminent health or safety risks to the public.

**Upon initiation and termination of Stage IV, the utility will mail a public announcement to its customers. Notice to TCEQ required.**

**Requirements for Termination:**

Stage IV of the Plan may be rescinded when all of the conditions listed as triggering events have ceased to exist for a period of three (3) consecutive days. Upon termination of Stage IV, Stage III becomes operative.

Operational Measures:

The utility shall visually inspect lines and repair leaks on a daily basis. Flushing is prohibited except for dead end mains and only between the hours of 9:00 pm and 3:00 am. Emergency interconnects or alternative supply arrangements shall be initiated. All meters shall be read as often as necessary to ensure compliance with this program for the benefit of all the customers.

Mandatory Water Use Restrictions: (all outdoor use of water is prohibited)

1. Irrigation of landscaped areas is absolutely prohibited.
2. Use of water to wash any motor vehicle, motorbike, boat, trailer, airplane or other vehicle is absolutely prohibited.

**In the event of system outage or supply contamination, the utility shall notify the TCEQ Regional Office immediately.**

**RESOLUTION FOR ADOPTION OF A DROUGHT CONTINGENCY PLAN**

**RESOLUTION NO. 06-01**

**A RESOLUTION OF THE BOARD OF DIRECTORS OF  
THE OLD MARBACH SCHOOL WSC  
ADOPTING A DROUGHT CONTINGENCY PLAN**

WHEREAS, the Board recognizes that the amount of water available to the Old Marbach School WSC and its water utility customers is limited and subject to depletion during periods of extended drought;

WHEREAS, the Board recognizes that natural limitations due to drought conditions and other acts of God cannot guarantee an uninterrupted water supply for all purposes;

WHEREAS, Section 12.1272 of the Texas Water Code and applicable rules of the Texas Natural Resource Conservation Commission require all public water supply systems in Texas to prepare a drought contingency plan; and

WHEREAS, as authorized under law, and in the best interests of the customers of the Old Marbach School WSC, the Board deems it expedient and necessary to establish certain rules and policies for the orderly and efficient management of limited water supplies during drought and other water supply emergencies;

NOW THEREFORE, BE IT RESOLVED BY THE BOARD OF DIRECTORS OF THE OLD MARBACH SCHOOL WSC:

SECTION 1. That the Drought Contingency Plan attached hereto as Exhibit "A" and made part hereof for all purposes be, and the same is hereby adopted as the official policy of the Old Marbach School WSC.

SECTION 2. That the general manager is hereby directed to implement, administer, and enforce the Drought Contingency Plan.

SECTION 3. That this resolution shall take effect immediately upon its passage.

DULY PASSED BY THE BOARD OF DIRECTORS OF THE OLD MARBACH SCHOOL WSC ON THIS 8 DAY OF February , 2006.

  
President, Board of Directors

ATTESTED TO:

  
Secretary, Board of Directors
